**Press Note.**

As a measure of relief to the atchkatdars who have suffered on account of the failure of wet crops under 277 tanks in Bagepalli Taluk due to inadequate rains during 1950-51, seasonal remission of half-wet assessment is sanctioned in respect of the atchkat lands under the said 277 tanks for the year 1950-51.

The total amount to be remitted is approximately Rs. 20,853-1-0.

*Health of Live-stock during May 1951.*

In their order of severity, outbreaks of Rinderpest, Blackquarter, Anthrax, Hæmorrhagic septicæmia, Sheep-pox, Ranikhet, Contagious-goat pleuro-pneumonia Foot and Mouth, and Rabies were encountered in the State during May 1951. Altogether 262 villages were reported to have been affected by one or the other of the several contagious and infectious diseases, as against 135 villages during the previous month. The number of outbreaks was highest in Bangalore, Tumkur and Mysore Districts, while Chikmagalur, Mandya and Hassan Districts were least affected. These diseases accounted for 965 animals of which 811 succumbed, as against 678 attacks and 519 deaths during the previous month. The departmental staff conducted 38,597 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention other prophylactic measures were adopted against Foot and Mouth disease.

Seven outbreaks of Rinderpest, of which two were among sheep and goats, were registered in Koppa, Kadur, Chitaldrug Jagalur, Tiptur and Chiknayakanahalli Taluks accounting for 52 attacks among cattle and 88 attacks among sheep and goats, of which 17 cattle and 42 sheep and goats succumbed. Prompt measures of control were undertaken by the Department to check its spread and 2,511 cattle and 821 sheep and goats in the infected villages and 4,087 cattle and 482 sheep and goats in 24 neighbouring villages were protected against this disease. The disease appeared to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 95 villages resulting in 9 deaths, as against 94 villages accounting for 63 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 6,462 animals as against 6,808 animals during the previous month.

The rest of the livestock remained free from diseases during the month and fodder and water were generally available throughout the State.
